With the safety and security of the College in mind, WCTC has partnered with Alertus Technologies and RAVE Mobile Safety to better communicate with students and staff in the event of an emergency on campus.

This partnership has produced a comprehensive, college-wide Mass Notification System (MNS) that provides alerts to the Pewaukee, Waukesha and Sky Plaza campuses as well as the Workforce Development Center.

**Alert Beacon®**
In the event of an emergency, beacons will be activated to communicate emergency information and provide directions. When beacons are activated they sound, flash and display an emergency text message.

**Panic Button**
Panic buttons are located beneath the beacons and are intended for individuals to call for help. When activated, they will send an alert to Campus Police and the Safety Office. The panic button does not connect to 911.

**Alertus Desktop™**
College computers in offices, labs and classrooms that are active and logged into the network, will receive full-screen pop-up alerts in the event of an emergency.

**External Speakers**
Speakers are located on the exterior of College buildings throughout campus. In an emergency, the speakers will be activated and broadcast emergency information.

**Internal Speakers**
Speakers are located inside the buildings throughout campus. In an emergency, the internal speakers will broadcast the message displayed on the Alert Beacon®.

**Hallway Monitors**
College wall monitors will display full-screen messages in the event of an emergency.

**WCTC Alerts**
In an emergency, the text messaging system will be used to provide staff and students with emergency information alerts and updates. Messages will be sent to WCTC email addresses as well as registered cellular phones via text message. Staff and students are encouraged to sign up for this service by selecting the WCTC Alerts icon located on the WCTC Portal.
